

## 5.0 METRIC IEC STANDARD MOTORS

Three-Phase Aluminum Frame

Drip Proof Motors

Single Phase Motors

Increased Safety Motors

Brake Motors

Flame Proof Motors

Slip Ring Motors

Squirrel Cage with Air/Air Exchanger

**G = B5 Flange unless otherwise specified.**

## TOTALLY ENCLOSED FAN-COOLED THREE-PHASE, SQUIRREL-CAGE MOTORS

LOW VOLTAGE

### 5.1 OUTPUT RANGE

The present catalog deals with TEFC, three-phase, squirrel cage induction motors (Series BF) with shaft heights from 71 up to 400 mm, in the following ranges:

- 0.37 up to 500 kW - 3000 rpm
- 0.185 up to 500 kW - 1500 rpm
- 0.12 up to 400 kW - 1000 rpm
- 0.09 up to 315 kW - 750 rpm

For either higher output and larger size motors and/or other speeds or voltages, please contact our Special Products Department.

### 5.2 STANDARDS

#### •DIMENSIONAL STANDARDS

The main dimensions of our BF series TEFC motors are according to IEC 72-1 (1991) that refers:

- the dimensions of foot-mounted motors,
- the dimensions of mounting flanges,
- the shaft extension dimensions,
- the preferred output values.

#### •INTERCHANGEABILITY STANDARDS

BF series TEFC motors are in accordance with CENELEC harmonization document HD 231 and also with most national interchangeability standards.

#### •QUALITY STANDARDS

The rating and performance of BF series TEFC motors meet the standards laid down in IEC 34-1 (1983). Their performances are also in accordance with most national standards specifically VDE 0530, NBN C 51-101, NF C 51-111. If required, the performances of BF motors may be changed and thereby adapted to special requirements or other national standards.

### 5.3 GENERAL CHARACTERISTICS

The characteristics listed below are the standard ones. If requested, others may be available.

#### •MECHANICAL PROTECTION

The standard degree of mechanical protection for motors, series BF4, is IP 54 and for motors, series BF5 and BF6, is IP 55 according to IEC 34-5 (1991).

#### •VOLTAGE AND FREQUENCY

MOTORS WITH FRAME SIZE UP TO 160

These motors are wound to work at either 50 Hz or 60 Hz, in the following voltage ranges:

- |  |                                  |
|--|----------------------------------|
| $\Delta$ 220-240/250-280 V 50/60 Hz }<br>$\text{Y}$ 380-415/440-480 V 50/60 Hz | For outputs up to<br>3 kW/3.6 kW |
| $\Delta$ 380-415/440-480 V 50/60 Hz  | For the remaining outputs        |
- For any voltage value in these ranges, a variation of -5% to +6% is allowed according to the majority of the standards. The electrical characteristics detailed in this catalog apply to the standard voltages/frequencies shown above. Strictly speaking, these values will vary slightly with actual voltage and frequency, but the variations will generally remain within the tolerances given in IEC 34-1 (1983).

#### MOTORS WITH FRAME SIZES 180 AND ABOVE

These motors are wound for operation only at one of the above-mentioned voltages and frequencies.

#### •INSULATION

All the models referred to in this catalog are class F insulated.

#### •TEMPERATURE RISE

Although the maximum temperature rise allowed for class F insulation will be 105 K, in general, the temperature rise of BF motors is below 80 K measured by resistance variation according to IEC 34-1 (1983).

#### •NOISE LEVEL

BF series TEFC motors meet IEC 34-9 (1990) concerning noise limits.

#### •DYNAMIC BALANCING

BF series TEFC motors are dynamically balanced with a half key according to IEC 34-14 (1982).

### 5.4 CONSTRUCTION

#### •CASING

In sizes up to 160 the stator frame, the IM 1001 drive-end endshield, the non-drive and endshield, and the terminal box are high-pressure die-cast in aluminum alloy. However, the endshields have integral cast iron liners forming the bearing housings. Flange endshields are in cast iron. In sizes 180 up to 225, the stator frame and the terminal box are low pressure die-cast also in aluminum alloy, the endshields being in cast iron. In sizes 250 and above, all of these parts are in cast iron.

## •SQUIRREL CAGE

The squirrel cages are in die-cast aluminum, the casting being by high-pressure or by centrifugation. However, the cages of the motors BF6 400, or 1000 and 750 rpm, are formed by copper bars brazed to copper end-rings using medium frequency technology.

## •TERMINAL BOX

On motors up to size 225 the terminal box is an integral part of the frame. Motors, sizes 250 and above, have a conventional terminal box that can rotate 180°. As standard in this range the terminal box entries are on the right side of the motor viewed from shaft end. By rotating the terminal box, these entries can be transferred to the left side. Below are the standard terminal arrangements and terminal box entries.

Motor Types	Quantities and Sizes	
	Terminals	Terminal Box Entries
BF5 71 up to BF5 90	6 x M4	2 x Ø 22.5 (¹)
BF5 100 and BF5 112	6 x M4	4 x Ø 28.5 (²)
BF5 132	6 x M6	4 x Ø 28.5 (²)
BF5 160	6 x M6	4 x Ø 37 (²)
BF5 180	6 x M8	4 x Ø 37 (²)
BF5 200 and BF5 225	6 x M8	4 x Ø 47 (²)
BF4 250 and BF4 280	6 x M10	2 x Pg 42 (³)
BF4 315	6 x M10	2 x Pg 48 (³)
BF6 315 up to BF6 400	6 x M12	2 x Pg 48 (³)

(¹) One entry on each side

(²) Two entries on each side

(³) Two entries on the right side that can be transferred to the left side

## •EARTH CONNECTION

All motors are equipped with an earth screw or an earth bar inside the terminal box. Earth bars are used on size 250 and above. All motors size 112 and above have a second earth screw or earth bar on one foot or on the flange as the case may be.

## •BEARINGS AND LUBRICATION

The motors of series BF5 are equipped on both sides with deep groove ball bearings greased for life and pre-loaded by an axial spring washer. The motors of series BF4 are equipped with a roller bearing on one side and a deep groove ball bearing on the other side. Grease nipples and grease valves are provided on both sides. The motors of series BF6 are equipped on both sides with deep groove ball bearings and pre-loaded by an axial spring washer. Grease nipples and grease valves are provided on both sides.

The standard drive end bearing will be replaced by a roller one when belt transmission is used or by an angular contact bearing when the mounting form is vertical. The bearing types for the motors referred to in this catalog are as follows:

Motor Type	Speed (rpm)	Bearing Reference	
		Drive End	Non-Drive End
BF5 71	All	6202 2Z C3	6202 2Z C3
BF5 80	All	6204 2Z C3	6202 2Z C3
BF5 90	All	6205 2Z C3	6204 2Z C3
BF5 100	All	6206 2Z C3	6205 2Z C3
BF5 112	All	6206 2Z C3	6205 2Z C3
BF5 132	All	6208 2Z C3	6208 2Z C3
BF5 160	All	6209 2Z C3	6209 2Z C3
BF5 180	All	6210 2Z C3	6210 2Z C3
BF5 200	All	6212 2Z C3	6212 2Z C3
BF5 225	All	6213 2Z C3	6212 2Z C3
BF4 250	All	NU 314	6314 C3
BF4 280	3000	6314 C3	NU 314
BF4 280	Other	NU 316	6314 C3
BF4 315	3000	6314 C3	NU 316
BF4 315	Other	NU 317	6314 C3
BF6 315	3000	6219 C3	6219 C3
BF6 315	Other	6220 C3	6219 C3
BF6 355	3000	6219 C3	6219 C3
BF6 355	Other	6222 C3	6219 C3
BF6 400	3000	6219 C3	6219 C3
BF6 400	Other	6224 C3	6219 C3

In IP55 motors the following V-Ring joints are used:

Motor Type	Speed (rpm)	V-Ring Reference	
		Drive End	Non-Drive End
BF5 71	All	V-14 A	V-14 A
BF5 80	All	V-18 A	V-14 A
BF5 90	All	V-25 A	V-18 A
BF5 100	All	V-30 A	V-25 A
BF5 112	All	V-30 A	V-25 A
BF5 132	All	V-40 A	V-40 A
BF5 160	All	V-45 A	V-45 A
BF5 180	All	V-50 A	V-50 A
BF5 200	All	V-60 A	V-60 A
BF5 225	All	V-65 A	V-60 A
BF6 315	3000	V-95 A	V-95 A
BF6 315	Other	V-100 A	V-95 A
BF6 355	3000	V-95 A	V-95 A
BF6 355	Other	V-110 A	V-95 A
BF6 400	3000	V-95 A	V-95 A
BF6 400	Other	V-120 A	V-95 A

## •FAN AND FAN COVER

Up to shaft height 160, the motors are equipped with a polypropylene fan, radially protected by a cover in aluminum alloy that is an integral part of the endshield, and axially protected by a polypropylene grid.

Motors of shaft height 180 and above are equipped with fans that can be made from polypropylene, aluminum alloy or welded construction. The fan covers are in stamped steel or welded constructed.

**G = B5 Flange unless otherwise specified.**

# INDUSTRIAL MOTORS

## • DIRECTION OF ROTATION

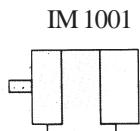

The motors up to a shaft height of 355 are equipped with a bi-directional fan so that they can turn in both directions. Motors of shaft height 400 are equipped with directional fans. The required direction of rotation of these motors must be specified in the order.

## • DRAIN HOLES

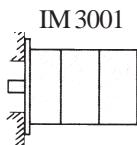

The motors up to shaft height 160 are not provided with drain holes. All the remaining motors have drain holes whose location depends on the mounting form of the motor.

## • NORMAL MOUNTINGS

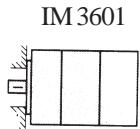

The normal mounting positions are the following, identified in IEC 34-7 code II:

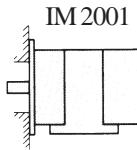

Motor with feet down. One shaft end.

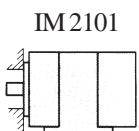

Motor without feet. One shaft end. Drive end flange mounting with free fixing holes. Horizontally mounted (available up to type BF4 315).

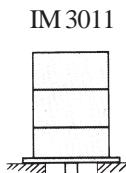

Motor without feet. One shaft end. Drive end flange mounting with threaded fixing holes. Horizontally mounted (available up to type 112).

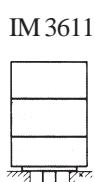

Motor with feet down. One shaft end. Drive end flange mounting with free fixing holes. Horizontally mounted.

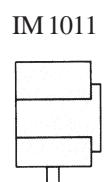

Motor with feet down. One shaft end. Drive end flange mounting with threaded fixing holes. Horizontally mounted.

As IM 3001, but vertically mounted with shaft end down.

As IM 3601, but vertically mounted with shaft end down.

Motor with feet. Vertically mounted with shaft end down.

## 5.5 TECHNICAL DATA

### • NOMENCLATURE KEY

BF	5	160	M	4	2	Number of Poles
						Code for Length of Core
						IEC Code for Length of Frame
						IEC Shaft Height (mm)
						Design Number
						Code for TEFC Motors

### • OUTPUT DERATING CONDITIONS

The outputs presented in the tables concern normal working conditions according to IEC 34-1 (1983). Environmental and electrical site conditions (altitude, atmosphere temperature, form and symmetry of voltage, and voltage variation during the operation) must be maintained within certain limits in order to get the nominal output from the motor. If these limits are not respected, then a reduction of output will occur as stated below:

#### Voltage

These motors can supply this nominal output only if the voltage variation is less than 5%. If a greater deviation occurs, then the output must be reduced to avoid dangerous overheating. The figures below should be observed:

Voltage Deviation	Output Reduction
± 5%	0%
± 7.5%	5%
± 10%	10%

#### Ambient Temperature

These motors can supply their nominal output if the atmosphere temperature is no more than 40°C. If a higher atmosphere temperature is expected, then the output must be reduced to avoid dangerous overheating. The figures below should be observed:

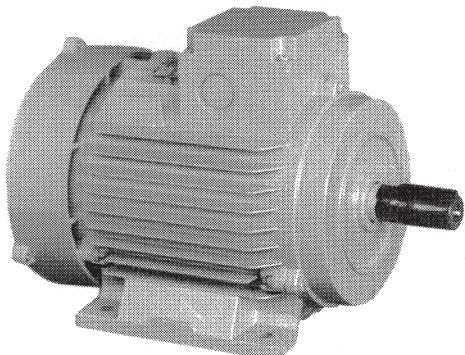

Ambient Temperature	Output Reduction
40°C	0%
45°C	5%
50°C	10%
55°C	15%
60°C	20%

#### Altitude

These motors were designed to operate at an altitude not exceeding 1000 m above sea level. If site conditions exceed this altitude, the following output reduction must be made:

Altitude Above Sea Level (m)	Output Reduction for Atmosphere Temperature of 40°C	
	40°C	25°C
1000	0%	0%
2000	6%	0%
3000	12%	0%
4000	18%	6%

\* All Ametric® Motors are designed to operate domestically at 60Hz and for export at 50Hz (with a corresponding change in voltage and RPMs) and are available with either foot or flange mountings. For outputs lower than 3 kw  $\Delta$  terminals = 220-240V/250-280V 50/60Hz & Y terminals = 380-415V/440-480V 50/60Hz. For outputs greater than 3 kw only  $\Delta$  terminals available at 380-415V/440-480V 50/60Hz . (voltage variation -5% +6%)

\* All Ametric® Motors are designed to operate domestically at 60Hz and for export at 50Hz (with a corresponding change in voltage and RPMs) and are available with either foot or flange mountings. For outputs lower than 3 kw △ terminals = 220-240V/250-280V 50/60Hz & Y terminals = 380-415V/440-480V 50/60Hz. For outputs greater than 3 kw only △ terminals available at 380-415V/440-480V 50/60Hz . (voltage variation -5% +6%)

## Flame-Proof Standards

All Ametric® BFGC Motors satisfy EN 50014, 50018 European standards for the IIC group of gases in the T4 temperature range. They are fitted with EEx d IIC flameproof terminal boxes.

**XN-XF Type Single Phase Motors  
where a high starting torque is  
required. Can be equipped with an  
auxiliary capacitor which is  
connected only in the starting  
phase.**

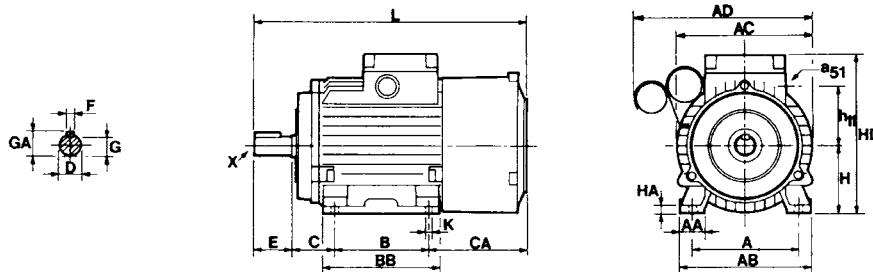

# TEFC SINGLE-PHASE MOTORS

## DIMENSIONS

### FOOT MOUNTED MOTORS

IM 1001; 1051; 1061; 1071; 1011; 1031
