

Poly-V Belts Molded
European Metric PH, PJ
American Inch H, J

The multi-wedge rubber belt combines the merits of both V and flat belts, i.e., Softness and tenacity of flat belts as well as compactness and high efficiency of V belts. Ametric® offer normal ground poly v-belts and Molded Poly-V Belts.

▶ **Molded V-Ribbed Belt**

Industrial Molded Poly-V Belts made by jacket construction, are with accurate size, Longer service, Lower noise, Less pilling. (Not by grinding method.)

Features and Advantages

- Joined by supersonic and have no overlap;
- More stable, more flexible, much lower noises, longer service life;
- Specially for tensioner system to avoid running noise caused by fabric overlap;
- Made by molded notch technology, having more advantages;
- Less heat building -up, thus better performance.
